## Education

**Vellore Institute Of Technology**

Bachelor of Technology

**Oct 2022 – May 2026**

*CGPA : 8.55*

## Experience

**Deep Surge Ai pvt ltd**

*Web Developer Intern*

**Jan 2025 – march 2025**

*Bhubaneswar*

- Contributed to the design and implementation of the Smart Health Consultation System backend, ensuring modular and maintainable code across patient, doctor, and admin modules.
- Developed and integrated RESTful APIs with proper validation, error handling, and logging to support seamless front-end communication.
- Designed AWS infrastructure (EC2, Beanstalk, RDS, S3) for scalable deployment

## Projects

**AI Drone Interceptor System — *Python, React.js, ML Models, REST APIs***

GitHub

- Built real-time analytics system processing 500+ trajectories/sec with 85% detection accuracy using statistical and ML techniques.
- Performed data analysis and model evaluation to improve prediction reliability and reduce false positives by 35%.
- Developed low-latency REST APIs supporting 1,000+ concurrent requests and complex operational scenarios.
- Designed interactive dashboards for real-time monitoring, enabling faster decision-making and response actions.
- Addressed abstract technical challenges through experimentation, testing, and iterative problem solving.

**PrepAI — ML Dataset Preprocessing Platform — *Python, Flask, Scikit-learn***

GitHub

- Automated dataset preprocessing and reporting workflows, reducing preparation time by 70%.
- Conducted exploratory data analysis using statistical metrics and visualization techniques to extract meaningful insights.
- Compared multiple algorithms and documented performance results for informed model selection.
- Designed system to support concurrent users while maintaining high availability and reliability.

**Smart Health Consultation System**

GitHub

- Engineered a 3-role health consultation system with 20+ REST API endpoints supporting patient, doctor, and admin operations.
- Implemented secure file storage using AWS S3 with encrypted upload and retrieval mechanisms.
- Achieved 99% unit test coverage and reduced backend latency by 25% through service-layer optimization.

## Technical Skills

**Languages:** Python, C/C++, HTML, CSS, JavaScript

**Developer Tools:** VS Code, AWS, Postman, Swagger, MS Excel, TheamLeaf, GitHub

**Technologies/Frameworks:** PowerBI, Git, Data Structures and Algorithms, Excel, NumPy, Pandas, OOPs Concept, Problem Solving, AI Machine Learning, Problem Analytic, DBMS, Debugging

## Leadership / Extracurricular

- **Technical Team Lead, CloudZone Club, VIT Bhopal** **Dec 2025**
- **Winner, Intra-University Chess Tournament, VIT Bhopal** **2024**
